## **CONSTITUTIONAL FORMALIZATION OF THE USSR'S TRANSITION TO A MARKET ECONOMY**

**Dmitry A. Lukashevich**

**Abstract.** Fundamental economic changes that occurred in the USSR in the second half of the 1980s were reflected in the norms of constitutional law. Constitutional legislation developed especially actively in the Union and Autonomous republics, which was due to the “parade of sovereignties”. In contrast to the republics, the constitutional changes at the level of the USSR were more “modest”, since the attention of the Union legislator was switched to the development of the draft of a new Union Treaty.

**Keywords:** market economy, private property, Union republics, perestroika, radical economic reform.

## **INNOVATION IN LAW: MODERN LEGAL TECHNOLOGIES IN THE CONTEXT OF DIGITAL REALITY. ARTICLE 2. TECHNICAL AND LEGAL TOOLS AND TECHNOLOGIES IN THE FIELD OF ACTION RIGHTS: TRADITIONAL VIEWS AND THE NEED TO REASSESS THEM**

**Vladimir I. Chervonyuk**

**Abstract.** Digitalization, technologization, robotization, development of artificial intelligence systems are interconnected, and in the latest conditions are interdependent quantities; the ever-increasing interactions between them significantly affect the legal life of modern society, the legal policy of the state, subordinate legal structures to their influence, form new legal practices, transform legal perception and legal behavior of communicating subjects, predetermine the need for innovative legal regulators.

In the twenty century legal technologies along with the function of rationalizing the behavior of social actors in the sphere of law are used to achieve large scale tasks of legal policy – introduction of new or redistribution of existing methods of legal regulation, design, testing and introduction of innovative legal regimes into the country's legal system, use of mechanisms for deregulation in the economy, transplantation of new types of procedural and control and Supervisory proceedings, systematization of large legislative arrays, and thus giving the law the necessary structure and systematic nature of action.

Innovative legal technologies are the production of a new product by means and techniques previously unknown to practice. In the context of the goals and objectives of digitalization, there is an urgent need for the wide use of «legal engineering» tools in various areas of public administration, in legislative and law enforcement activities, in the field of law enforcement and in the organization of legal behavior of direct legal users. **Roman B. Osokin, Vladimir G. Kokorev**

**Abstract.** The article reflects the peculiarities of the criminal policy of the Russian Federation to improve liability for driving while intoxicated. The expediency of art. 264.1 of the Criminal Code «Violation of the rules of the road by a person, subject to administrative punishment», indicates a tendency to reduce administrative offenses under art. 12.8 «Driving by a driver, intoxicated, transfer of control of the vehicle to a person intoxicated» and 12.26 «Failure by the driver of the vehicle to comply with the requirement to undergo a medical examination for intoxication» of the Administrative Code of the Russian Federation after criminalization of this act in the Criminal Code of the Russian Federation. The authors emphasize that the name of art. 264.1 of the Criminal Code of the Russian Federation – in comparison with its content, reflects only the presence of administrative precedence, while its content indicates the presence of a criminal record of a person for committing acts fixed in hh. 2, 4 and 6 art. 264 of the Criminal Code of the Russian Federation while intoxicated acts. To resolve such a conflict, the authors propose two solutions: the first is to expand the name of art. 264.1 of the Criminal Code, removing from its name the emphasis on the presence of «administrative punishment», and the second is to differentiate the liability contained in it, reflecting it in two articles of the Criminal Code of the Russian Federation (in art. 264.1 of the Criminal Code of the Russian Federation leave administrative precedence, and a person's criminal record for committing crimes specified in part 2, 4 and 6 of article 264 of the Criminal Code of the Russian Federation, be reflected in part 7 of article 264 of the Criminal Code of the Russian Federation).

## **SUBJECTS OF EVIDENCE IN CRIMINAL CASES OF CRIMES RELATED TO THE FORMATION OF THE BUDGET OF THE RUSSIAN FEDERATION (TAX CRIMES)**

**Yuriy G. Kleshchenko**

**Abstract.** In this article, the author reveals the features of the evidence process in the investigation of crimes related to the formation of the budget of the Russian Federation (tax crimes). The author defines the classification of subjects of evidence, notes the special public danger of tax crimes, or crimes related to the formation of the budget of the Russian Federation, and discusses the feasibility, in addition to improving the activities of existing State authorities, of creating a specialized State service for the investigation of crimes in the financial and budgetary sphere. At the same time, the article noted that at present there is a situation in practice in which criminal cases of crimes in the financial and budgetary sphere are investigated by different authorities, this maintains a balance of interests and does not “strengthen” any one law enforcement agency, which minimizes the corruption component.

**Keywords:** proof, subjects of proof, crimes related to budget formation, tax crimes, Federal Tax Service, law enforcement agencies.

## **INVESTIGATION OF THE “HYPOTHETICAL” VALUE OF THE VEHICLE SPEED AT THE MOMENT OF HITTING A PEDESTRIAN WHEN THE DRIVER APPLIES BRAKING AT A GIVEN MOMENT OF DANGER OCCURRENCE**

**Pavel A. Losev**

**Abstract.** In some road traffic situations with a collision with pedestrians, drivers apply the braking provided for by the Traffic Rules of the Russian Federation with some delay relative to the objective moment of danger to traffic, or do not apply any measures to reduce speed. In such cases, an expert can investigate the question of the value of the “hypothetical” speed of the vehicle at the time of impact, to which the driver could reduce the speed of the controlled vehicle when applying braking at a given moment. Such a value of the “hypothetical” speed can be used to solve the problem of causal relationships between the actions of the driver of the vehicle and the consequences that have occurred (the severity of injuries sustained by a pedestrian as a result of an accident).

**Keywords:** hit-and-run, technical ability to prevent hit-and-run, cause-and-effect relationship, “hypothetical” vehicle speed.

## **BASIS AND CONDITIONS FOR ANNOUNCEMENT IN THE INTERNATIONAL SEARCH**

**Maksim Yu. Tarasov**

**Abstract.** In the procedure for declaring a person on the international wanted list for the purpose of arrest and extradition for criminal prosecution or execution of a sentence, such categories as grounds and conditions invariably appear. Meanwhile, in the special literature devoted to the issues of international search, there is no sufficient clarity in the understanding of these categories, different circumstances are named as the grounds and conditions for declaring them on the international wanted list, conditions are often not delimited from the grounds, sometimes they are simply mixed with each other.

In the article, on the basis of the conducted research, the concept of the grounds and conditions for declaring a person on the international wanted list is given, their system is given, and the inclusion of certain circumstances in it is argued. On the basis of the proposed system, the specific content of the grounds and conditions for declaring it on the international wanted list is disclosed, taking into account the regulatory legal acts in force in this area.

**Keywords:** international search, interstate search, grounds for declaring an international wanted list, conditions of the international wanted list, the content of the grounds for declaring it on the international wanted list, system of conditions for declaring an international wanted list.

## **INTRODUCTION OF INFORMATIZATION AND ARTIFICIAL INTELLIGENCE TECHNOLOGIES AS PROSPECTIVE DIRECTIONS OF DEVELOPMENT OF MODERN CRIMINAL PROCEEDINGS**

**Vasily Yu. Fedorovich, Olga V. Khimicheva, Alexey V. Andreev**

**Abstract.** In the modern scientific space, potential areas of use of informatization and artificial intelligence technologies are increasingly being explored. A regulatory legal framework is being created for the use of these technologies, including in the field of jurisprudence. Considering possible ways of introducing informatization and artificial intelligence technologies into criminal proceedings, the authors propose to be based on international documents and use foreign experience. ## **ON THE ISSUE OF THE LEGAL STATUS OF STATE CORPORATIONS**

**Yulia N. Sosnowskaya. Eleonora V. Markina**

**Abstract.** In the article the authors consider issues related to the legal status of state corporations.

The main directions of development of corporations, as well as the effectiveness of their activities in conditions of tough competition, are determined by the ability to create and implement innovative strategies in their activities. Domestic state corporations, having a significant set of modern unique product samples and technologies for their manufacture, continue their development without using modern scientific achievements. State corporations are participants in administrative legal relations and carry out their activities on behalf of the state. The administrative and legal status of public corporations is investigated by analogy with the administrative status of the state civil service.

## **REGIONAL CREATIVITY AND DIGITAL REGIONALISM**

**Igor' V. Groshev, Aleksei A. Krasnoslobodtsev, Nodari D. Eriashvili**

**Abstract.** The factors that determine the process of digitalization and online development of the Russian Federation are analyzed. The dynamics of the development of «digital opportunities» with the actualization of the problem of studying the process of «digitization» of the main spheres of life of regional Russian spaces is considered. The paper presents a schematic model of factorial variables that determine the process of «penetration» of new digital products and services on the regional territories of the country, one of which is regional creativity. The authors developed a model of the components of the regional creativity index and put forward a hypothesis about the possible influence of the regional environment creativity effect on the process of digitalization. To determine the correlation between the index of creativity and the level of regional digitalization, a composite index of creativity of each of the 85 regions of the Russian Federation was calculated using the method of constructing the index of the index of creativity. Groups of regions-leaders and outsiders-are singled out. Digitalization indices are calculated to measure the index of digital life in Russian regions. When comparing the ranks of regions on the composite index of creativity and the index of digital life, it is concluded that there is no direct correlation between these factorial indicators. The comparison allowed us to identify three groups of regions in which the Russian economic environment structures regional spaces according to its creative and digital matrices. Based on the proposed research approach, it is concluded that the creativity of the region does not affect the speed and depth of the regional process of digitalization and is not always one of the determining factors of regional «digitization», which is the basis of regional disparities in the level of development of digital economy.

## **INCREASING THE LEVEL OF ECONOMIC SECURITY ON THE BASIS OF REGULATING MIGRATION PROCESSES**

**Asya A. Kushkhova, Nikolaj P. Kupreshhenko**

**Abstract.** In recent years, European countries have been forced to constantly search for solutions to resolve the migrant crisis caused by the multiple growth of the flow of illegal migrants and refugees to the EU. For Russia, the migrant crisis is a permanent process that proceeds in a relatively sluggish mode (in comparison with the aggravation of the situation in the EU countries). The changes in society associated with the COVID-19 pandemic have exacerbated and exposed many of the problems in this area. For the state, one of the primary tasks is the settlement of the migrant issue as one of the most important factors in strengthening national security.

## **ECONOMIC EFFICIENCY OF ARTIFICIAL INTELLIGENCE TECHNOLOGIES**

**Nelli V. Tskhadadze**

**Abstract.** Improving the efficiency of a market economy requires a multiplier effect from the digitization of all its areas. In this regard, it is especially important to actively develop and constantly improve the digital technology market. So, along with the traditional resource markets – land, labor market and capital, the digital technology market is beginning to occupy a priority place in the activities of modern business, especially in connection with the production and use of artificial intelligence. Society is entering an era of an intellectual world where everything is interconnected. Digital business is a combination of physical and digital business assets that blur the boundaries between people and processes to achieve business goals.

## **PUBLIC FINANCE: DEVELOPING TOOLS FOR MODERN BUSINESS CONDITIONS**

**Sergey Yu. Ilyin, Gamlet Ya. Ostaev, Boris N. Khosiev**

**Abstract.** The article presents the author's position on the assessment of efficiency indicators and the intensification of finance in the activities of states operating in the current economic conditions. In the process of the study, a toolkit has been developed, consisting of a group of indicators that allow states to analyze them in generalized and detailed forms. The choice of the resulting and factorial indicators of efficiency and intensification was made on the basis of the current trends in the development of the national and world economy, expressed in the globalization of economic processes and the clear objectivity of internal and external monetary receipts. The indicators of the study in generalized and detailed forms were the direct and indirect profitability, which are the resulting indicators of the efficiency of public finance, calculated by comparing government revenues and government expenditures and changes in the income and expenditure elements of cash flows under the influence of efficiency and cost (affecting factor indicators) of national and international projects of states related to the resulting intensification indicators. They are aligned with all economic positions and are fully adapted to the generally recognized financial, economic and financial management economic requirements for the activities of the public sector.

## **ROLE MODEL AS A PREDICTOR OF ADOLESCENTS' ATTITUDES TO THE FAMILY FUTURE**

**Artur A. Rean, Darya V. Molchanova, Ivan A. Konovalov**

**Abstract.** The article analyses the predictors of teenagers' interest in the issue of creating their own family through the study of descriptors, descriptive characteristics of parental figures, as well as by identifying the links between a sense of happiness and the desire to reproduce life scenarios of the parental family. The most and least popular ways of describing a mother and father are investigated, trends in the use of certain characteristics are revealed. The desire to repeat or not to repeat the scenario of the parental family is statistically significantly related to the idea of the family as a prerequisite for happiness. Despite the different number of children in the parental family, most teenagers plan to create a family with two children in the future. Moreover, the presence of children is the least popular answer when ranking the conditions of a successful marriage. The results match with ideas about changing the views of adolescents on the issue of family and children, but it is important to note a positive trend – in 81.6% of cases, adolescents nevertheless consider the possibility of creating their own family, despite the fact that only 41.9% of the subjects want a parental scenario.

**Keywords:** family, adolescents, role model, parental images, image of mother, image of father.

## **PSYCHO-REGULATORY SUPPORT OF THE DOMINANT MENTAL STATES OF THE CONVOY DEPARTMENT OF THE FEDERAL PENAL CORRECTION SERVICE SYSTEM<sup>1</sup>**

**Inna V. Vasileva, Sergey V. Ivantsov**

**Abstract.** Employees of the convoy department of the Federal Penal Correction Service system of Russia are used as adaptive coping strategies: planning a solution to the problem, self-control, seeking social support; and conditionally adaptive: flightavoidance, distance. The tension of any of the coping leads to an inadequacy of the employee's assessment of his mental state and, accordingly, to inadequacy of his regulation by means of psychological protection.

**Keywords:** stress, officers of the convoy department of the Federal Penal Correction Service system of Russia, psychological protection, mental states.

## **ROMAN INGARDEN ON THE PSYCHOLOGY OF AESTHETIC PERCEPTION**

**Lyudmila V. Molodkina**

**Abstract.** The submitted paper provides a brief analysis of the phenomenological ontology and psychology of art in the philosophical studies of the Polish thinker Roman Ingarden. The author claims that R. Ingarden, as a phenomenologist, very accurately uses art to substantiate the psychological aspects of ontological problems, which allows him to be recognized as the founder of phenomenological aesthetics. A number of examples from the sphere of architectural monuments as works of art demonstrate the movement of memorial meanings revealed by the streams of intentional consciousness, which undoubtedly testifies to the scientific and philosophical significance of R. Ingarden's phenomenological-psychological research, and to his independent contribution to aesthetic theory.
