

Ethics of education and modern cultural practices

V. Yu. Belsky, A. L. Zolkin

Abstract. The actual problem solved in the article is related to the transformation of the moral foundations of the liberal-globalist strategy of education into a civilizational strategy of the ethics of education. It is proved that the liberal moral foundations of education lead to the formation of repressive cultural and psychological practices that chaoticize the social space as a whole. The ethical foundations of education are revealed, generating synergetic effects, contributing to the coordination of the principles of individual choice and social ethics in the psychological process of personality formation.

Keywords: morality, morality, ethics, social ethics, education, culture, cultural practices, synergy, civilization, individual, human potential, personality.

Actual problems of increasing the level of professional and psychological preparedness of district police officers

A. V. Gainullina

Abstract. The article discusses the psychological aspects of the activities of district police officers, an empirical study of the features of their professional and psychological preparedness, raises the problems of high-quality professional and psychological training of future district police officers, the author pays special attention to the formation of the psychological readiness of district police officers for preventive work with the population.

Keywords: district police officers, citizens, professional and psychological preparedness, preventive activities, training, education.

To the question of the psychological characteristics of adolescents registered in the departments for juvenile affairs

I. S. Ganishina, S. M. Vorobyov

Abstract. The aim of the study was to study the psychological characteristics of adolescents registered in the juvenile affairs units (hereinafter referred to as juvenile affairs) in order to increase the effectiveness of their psychological support.

An empirical study of adolescents was conducted on the basis of the departments for juvenile affairs in the city of Ryazan. The study involved 50 adolescents registered with the PDN. When studying the psychological characteristics of adolescents, the following psychodiagnostic methods were used: analysis of personal files, observation, questioning, testing, the technique of «Individual-Typological Questionnaire»

(L.N. Sobchik). For the purpose of processing the obtained data, the computer program Psychometric Expert (version 9.2.0) was used.

The following psychological characteristics of adolescents registered in the PDN have been established: the level of intelligence and self-control is below average, they have a high level of carelessness, aggressiveness, conflict, they hardly make contact, most of them are characterized by conflict, social maladaptation, resentment, a tendency to act thoughtlessly, the desire to prove their own significance, sensitivity.

The results of the psychodiagnostic study of the psychological characteristics of adolescents registered with the PDN will improve the quality of psychological assistance provided to them and the process of psychological correction of the psychological characteristics of persons in this category.

Keywords: adolescents, personality, juvenile departments, psychological characteristics, psychological correction.

Problems of using virtuality systems in training process of specialists in the field of forensic examination (psychological and pedagogical aspects)

I. A. Gorsheneva, I. S. Lukinsky, M. I. Lukinskaya

Abstract. The article observes peculiarities of using information and communication technologies, in particular virtual reality systems, during educational process, modern transformation problems in educational process by suggesting innovative theoretical and practical component of specialist training, the psychological and pedagogical aspects of using this technology.

Keywords: information and communication technologies, educational process, virtual reality, theoretical and practical component of training, psychological and pedagogical aspects of training specialists.

The use of mechanisms of stress-overcoming behavior in the course of official activity by police officers

E. A. Evtushenko, I. B. Lebedev

Abstract. This article describes the specific mechanisms of stress-overcoming behavior used by police officers in the course of their official activities. The mechanisms of coping with stress are compared, focused both on protection and on different coping with a problematic situation.

Keywords: stress overcoming behavior; police officers; psychological protection; coping behavior; psychology of professional activity.

Taking into account the psychological characteristics of minors who have committed a crime when imposing punishment

I. G. Yelesina

Abstract. The need for special rules on the responsibility of minors in criminal law directly follows from the principles of justice and humanism. On the one hand, a minor, "due to his physical and mental immaturity, needs special protection and care, including proper legal protection," and therefore society cannot present him with requirements equal to those imposed on an adult. On the other hand, the subtleties of the psychology of a minor make it possible to best realize the goals of criminal punishment by applying special, not so cruel punishments.

Keywords: juvenile convict, criminal responsibility, punishment, criminal behavior.

Antisocial attitude of personality and sociopathy of juvenile convicts: differential diagnosis and correction

G. S. Zalyashchev

Abstract. In the process of correcting juvenile convicts, it is important to identify the psychological causes of their crimes. To facilitate such work in practice, typical causes of antisocial behavior can be identified. One of such reasons is the antisocial attitude of the personality of juvenile convicts. It is based on: the isolation of oneself from society, a stable negative attitude towards it, the opposition of oneself to it. Similar behavioral manifestations are often manifestations of sociopathy. At the same time, the two named psychological reasons are different in their essence, are amenable to psychological correction to varying degrees and require the use of different psychocorrectional methods. Therefore, it is important for a practical psychologist of a penitentiary institution to distinguish the antisocial position of a person from the sociopathies of juvenile convicts. But until now, this problem has not been considered in legal psychology and related sciences.

Keywords: antisocial attitude of personality, juvenile convicts, correction, sociopathy, antisocial personality disorder.

Socio-psychological prevention of conflicts in interpersonal relationships of adolescents with deviant behavior in an educational organization

A. A. Zuykova, A.I. Safronov, M. B. Kostikov

Abstract. The content of socio-pedagogical prevention of conflicts in interpersonal relationships of adolescents with deviant behavior in an educational organization is considered. The analysis of the causes and conditions of the deviant behavior of

adolescents, as well as the styles of behavior in a conflict situation in adolescents with deviant behavior identified during the diagnostic study, allow us to develop a program for the prevention of conflicts in interpersonal relationships of adolescents with deviant behavior in an educational organization, which should include activities, aimed at: reducing the level of aggressive behavior; forming adequate self-esteem; developing communication skills; increasing emotional and volitional control.

Keywords: conflict, conflict behavior, conflict prevention, interpersonal relationships, deviant behavior.

The phenomenon of the prestige of service in the bodies of the internal affairs as indicator of staff turnover assessment

E. V. Kostina

Abstract. The article presents the results of a study of the phenomenon of the prestige of service in the internal affairs bodies of Russia as an indicator of staff turnover. The theoretical aspects of personnel policy in the internal affairs bodies of the Russian Federation are considered. The main reasons for the formation of problems and shortcomings of personnel policy in the internal affairs bodies are highlighted. The mechanisms of influence of the prestige of service in the internal affairs bodies on the level of staff turnover are analyzed. A qualitative and quantitative analysis of the results of studying the indicators of the socio-psychological climate and the moral and psychological state of employees was carried out. Topical solutions aimed at improving the personnel policy in the internal affairs bodies in order to increase the prestige of the service and reduce staff turnover are proposed.

Keywords: prestige of the service, image of the profession, image of a police officer, internal affairs bodies, staff turnover. motivational statistics, personnel management, personnel policy, managerial culture, employee self-worth, personnel mobility, selection index.

Psychological features of teenagers' propensity to extremism

I. B. Maryasis, E. M. Goncharova

Abstract. The article is devoted to the study of the psychological characteristics of the propensity of adolescents to extremism, it presents statistical data on committed crimes of an extremist nature, describes the mechanisms of the emergence of an extremist orientation among young people, analyzes an experimental study among adolescents in order to study the level of extremist sentiments among adolescents.

Keywords: teenagers, extremism, youth environment, social deviations, disorganization, destructive behavior.

The role of ritual in the functioning of the extremist movement AUE

V. V. Orlov

Abstract. On August 17, 2020, the Supreme Court of Russia, at the request of the Prosecutor General's Office, recognized the international public movement «Convict Criminal Unity» (hereinafter AUE) as an extremist organization. However, the ban on the AUE movement did not eliminate the problem, but only created the prerequisites for its going underground. In this regard, the issue of studying this phenomenon in order to develop methods to counter it remains relevant. In the material proposed below, the author examines the ritual component of the activities of the grassroots structures of the AUE, that is, irrational activity, the results of which are valuable exclusively within group limits. Without understanding the functioning of this psychological mechanism, the development of effective methods of countering the extremist movement is impossible.

Keywords: AUE, criminal subculture, extremism.

Psychological features of anxiety's expression of the cadets and students of the Moscow University of the Ministry of Internal Affairs of Russia named after V.Ya. Kikot'

K. D.Pashentseva, D.A. Anufrieva

Abstract. The article deals with the psychological features of the manifestation of anxiety among cadets and students at various stages of obtaining professional education in a higher educational institution.

Keywords: anxiety, psychological characteristics, vocational training.

Psychological conditions for the formation of reliability of employees of the Ministry of Emergency Situations of Russia

S. N. Savinkov

Abstract. The object of the study was the psychological conditions for the formation of reliability among employees of the Ministry of Emergency Situations of Russia, in the process of performing their professional activities. The purpose of the study was to identify conditions conducive to improving the personal and professionally important qualities of the subjects. The research is aimed at

identifying the psychological conditions necessary for the formation of reliability of employees of the Ministry of Emergency Situations of Russia, as well as determining the personal characteristics of employees that affect the content and mechanisms of reliability formation. The research methods used were the method of expert assessments, the Mini-cartoon test, the 16-factor personality questionnaire by R. Kettell, the DMO Technique (T. Leary), the «Trust-Distrust» Technique (A. B. Kupreichenko), «Subjective assessment of interpersonal relations» Technique (S. V. Dukhnovsky). The study involved 156 people (men, aged 20 to 45 years, active employees of fire and rescue units of the Ministry of Emergency Situations of Russia, in Moscow). As a result of the conducted socio-psychological training, personal self-regulation skills were formed in the conditions of professional activity, ensuring psychological stability, stimulating activity, developing communication skills, team building, updating the resource potential of the individual, expanding models of constructive interaction. Our research has shown and confirmed the idea of socio-psychological training as an important and powerful tool that contributes to the formation of a professional personality, as well as the possibility of short-term and effective intervention to improve the reliable work of employees of the Ministry of Emergency Situations of Russia.

Keywords: employees of the Ministry of Emergency Situations, reliability, professionally important qualities, formation, conditions, socio-psychological training, research.

Awareness of a crime among other types of personal awareness

F. K. Svobodniy

Abstract. The article based on the analysis of dissertation research of domestic psychologists and lawyers, clarifies the essence of the phenomenon of «personal awareness of crime» and its place in the structure of personal awareness. It is proposed to divide the awareness of the individual into general awareness, as well as into sectoral and subject types of awareness. It is shown that the awareness of a person about a crime is one of the subject types of personal awareness. The author's definition of the concept of «awareness of a person about a crime» is proposed.

Keywords: awareness, awareness, crime, types of awareness, awareness of the crime.

Domestic Social Psychology: State and prospects

A. N. Sukhov

Abstract. This article reveals the main problems associated with the development of domestic social psychology. It also discusses various theoretical approaches to

understanding its subject, as well as the structure and main problems of applied social psychology.

Keywords: subject, socio-psychological phenomena, methodology, praxeology, theoretical approach, industry, paradigm.

Predictors of vandal behavior in adolescents

O. Yu. Ananyin, A. A. Zuikova

Abstract. In modern society, the problem of vandalism is widespread among teenagers, because for this age group, it is an affordable way to implement a wide variety of motives and ideas, often not requiring preparation, planning, availability of skills, special tools and means, as well as not requiring costs. In this article, the authors analyzed various methodological approaches to the study of vandalism, the predictors of vandal behavior in adolescents. The results obtained during the study will be useful to specialists in the field of prevention of deviant behavior of children and adolescents.

Keywords: vandalism, destructive behavior, deviant behavior, adolescence, predictor.

Formation of students' soft skills: experience of the Institute of the Academy of the Federal Penal Service of Russia

G. B. Andreyeva, O. A. Nikitina

Absrtact. The article deals with different approaches to professional training in modern society. It is not enough for a young person to master an educational program in a selected area if he wants to be a success in profession. Efficient career presupposes development of soft skills.

Keywords: soft skills, effective career strategies, educational system, modern personnel.

The development of speed in the process of learning fighting techniques in educational organizations of the Ministry of Internal Affairs of Russia

A. S. Andrianov, I. V. Medvedev, V. V. Semenov

Abstract. The main direction of law enforcement activity is the suppression of crimes and administrative offenses. In most cases, the implementation of this direction is associated with the use of physical force, fighting techniques, special means and firearms. The use of force methods in various situations of

administrative coercion requires from a law enforcement officer, first of all, the ability to respond in a timely manner to the conditions created, make decisions quickly, implement them competently and anticipate the consequences. This whole complex of skills and qualities is based on a mental and physiological set of human characteristics, the most important of which in this context is speed. Consequently, the process of professional training in educational organizations of the Ministry of Internal Affairs of Russia should provide for the possibility of developing speed as a priority component of the physical training of the future policeman.

Keywords: speed, physical qualities, fighting techniques, law enforcement officers, universities of the Ministry of Internal Affairs of Russia, professional training.

Research activities of students of educational organizations of the Ministry of Internal Affairs of Russia – future PD inspectors in the field of technologies for shaping a healthy lifestyle of modern adolescents

A. A. Bazulina, G. M. Seminenko, D. A. Platonov

Abstract. The authors consider such a direction of scientific research of students of educational institutions of higher education of the Ministry of Internal Affairs of Russia as technologies for shaping a healthy lifestyle in modern adolescents. The interest in this topic is dictated by the need to prepare future inspectors for juvenile affairs to carry out prevention, the implementation of psychological and pedagogical technologies focused on the formation of attitudes towards a healthy lifestyle among minors. In addition, the authors describe in detail the program aimed at the formation of a healthy lifestyle among adolescents, implemented based on a comprehensive school. The novelty of the article is seen in the generalization of existing scientific ideas and the author's approach to this issue.

Keywords: healthy lifestyle, juvenile affairs inspector, teenagers, educational institution, program.

Alternative methods of development of the respiratory system

R. I. Boxarev, K. N. Kostikov

Abstract. It is not necessary to be a professional athlete to have results in physical training. Regular classes are enough, the desire to improve not only muscle mass, but also to try to perform exercises correctly. After all, as the French writer and public figure Victor Hugo said: «It is necessary to maintain the strength of the body in order to preserve the strength of the spirit». Do not forget that fitness for physical exertion depends on the work of the respiratory system. There are several ways to develop it.

Keywords: respiratory system, physical fitness, health.

Development of endurance among cadets of educational organizations of the Ministry of Internal Affairs of Russia

V. M. Bychkov, M.V. Bychkov, A. E. Bazhenov

Abstract. This publication will be useful to teachers and cadets of educational organizations of the Ministry of Internal Affairs of Russia in understanding the concept of «endurance» as a physical quality and its development both in physical training classes and in extracurricular hours on independent training.

Keywords: educational organizations of the Ministry of Internal Affairs of Russia, cadets, endurance, training, training process.

Technological approach to the formation of the readiness of future officers of security units in departmental educational organizations for professional activities related to the use of small arms

E. S. Volkov, P. A. Gusev

Abstract. The article considers a technological approach that forms the readiness of future officers of security units for professional activities related to the use of small arms in departmental educational organizations.

Keywords: technological approach, teaching technology, professional pedagogy, teacher, students, teaching methods.

On increasing the effectiveness of training in combat techniques of fighting in educational organizations of the Ministry of Internal Affairs of Russia

D. Yu. Grebnev, V. A. Khromov

Abstract. The article is devoted to the topic of improving the effectiveness of mastering combat techniques of wrestling in physical training classes at universities of the Ministry of Internal Affairs of Russia.

Keywords: police officer, cadet, fighting techniques of wrestling, martial arts, physical training, blow, painful reception, protection.

To the question of the content and normative consolidation of the concept of «hand-to-hand combat»

M. A. Efremenko, D. O. Efremenko

Abstract. The article deals with the issue of correlation between the content of the concept of «hand-to-hand combat», used in the scientific and regulatory environment. The main attention is paid to the main sources regulating the technique of hand-to-hand combat, as the basis for service-applied training of law enforcement officers.

Keywords: hand-to-hand combat, service-applied training, instruction, physical training, fighting techniques, sports, martial arts.

On the issue of sovereignization of the national education system

S. S. Zhevlakovich

Abstract. The article analyzes the consequences of the exclusion of Russian universities from the Bologna educational process, as well as the main aspects of the formation of a domestic education system focused on national interests, goals and objectives.

Keywords: Russian education system, higher education, Russian higher education, vocational education, general education, secondary vocational education, additional vocational education, educational sovereignty, Bologna educational process, specialty, bachelor's degree, master's degree, postgraduate study (adjuncture), federal state educational standard higher education (FSSES HE), unified state exam (USE), educational program, qualification, individual educational trajectory.

The specifics of teaching the communication in foreign language in educational organizations of the Ministry of Internal Affairs of Russia

T. A. Zemlyakova, V. D. Zemlyakov

Abstract. The article is devoted to the problem of the formation of the ability to apply communicative technologies in a foreign language for academic and professional communication. It is analyzed the features of teaching speaking in educational organizations of the Ministry of Internal Affairs of Russia, namely: the objectives of training, the content of training, forms of communication, methods of organizing and conducting training sessions, the implementation of the principles of professionally oriented training and interdisciplinary connections. The authors of the article reveal in detail the implementation of the principles of teaching business communication to police officers, on which the modern methodology of teaching foreign languages is based.

Keywords: communication, foreign language, foreign citizen, principle, communicative situation.

Constitutional and legal foundations for the personal safety of minors in the Russian Federation

E. Yu. Zinchenko, I. G. Evseeva, E. N. Khazov

Abstract. The article is devoted to the study of the constitutional and legal foundations for regulating the personal safety of minors in the Russian Federation, taking into account the influence of modern national and global socio-cultural threats that affect the moral degradation of the younger generation, the growth of child homelessness and crime, as well as the growth of suicide rates among minors. Within the framework of the article, a historical-legal and comparative-legal analysis of the existing legal system that ensures the safety of minors is carried out, including the effectiveness of the implemented measures of a legal and state-practical nature.

Keywords: censorship, safety of minors, information control, personal safety, sphere of childhood, juvenile delinquency.

Increasing trainers 'motivation for physical education

M. M. Ivanova, V. N. Ivanova, N. B. Alaskarov

Abstract. The article deals with the problem of formation of motivation of cadets to engage in physical culture; the results of a survey to identify the main reasons for the insufficient level of motivation of students are presented. The conducted pedagogical experiment on increasing the motivation of cadets for classes in the discipline «Physical Preparation» is described; the conclusion is made about the effectiveness of organizational and methodological techniques proposed to solve the issues of increasing motivation.

Keywords: motivation, educational process, cadets, physical culture, physical qualities, physical fitness.

Diagnostics of special education of students-athletes

S. V. Manannikov, O. I. Vorobieva, T. Sh. Kazbekov

Abstract. This article considers the theoretical practical aspect of the problem of diagnosing the special preparedness of students-athletes. One of the most important problems of sports training is analyzed - the management of special functional readiness of student-athletes. The rational management of the training of student-athletes, which involves the development of means and methods for their training and diagnostics, is considered. The work investigated: the dynamics of the functioning of the organism of qualified student-athletes in the conditions of sports fights; the possibility of determining the value of an individual bicycle ergometric

load; the influence of additional tasks on specialized motor responses in the process of fulfilling model physical loads on the dynamics of the heart rate of qualified student-athletes. The study was carried out in four stages. Thus, the study showed that the calculated and experimentally verified regression equations allow setting the required levels of physical load power in training conditions to bring the body of student-athletes to the required model level of functioning, depending on the tasks of training and diagnostics. The diagnostic complex and the proposed method of load modeling can be used for programmed functional training and for monitoring the special functional readiness of student athletes.

Keywords: diagnostics, special readiness, bicycle ergometric load, competitive activity, model physical loads, subcritical load, critical load, supercritical load.

Criteria for evaluating the effectiveness of the system of material and moral incentives for expert officers of the Rosgvardiya construction complex

Abdel-Nasir M. Kaibov

Abstract. The main purpose of this article is to consider the issues of moral and material incentives for expert officers of the Rosgvardiya construction complex as a system. The author has determined what is the criterion, what requirements have been developed for the criteria and proposed criteria for evaluating the effectiveness of such a system.

Keywords: criteria for assessing material and moral incentives, criterion approach, evaluation of the effectiveness of the system, incentives, quality and result of service and expert activities, the impact of incentives on expert officers.

Methodology of subjectivity of law enforcement officers and conditions of its formation among cadets of educational organizations of the Ministry of Internal Affairs of the Russian Federation

I. A. Kalinichenko, L. A. Kazantseva

Abstract. The article analyzes the importance of subjectivity of law enforcement officers for improving the quality of professional activity, the level of professional competence and individual processes of personal and professional self-development. Methodological approaches that ensure the formation of the subjectivity of cadets in the process of professional training in educational organizations of the Ministry of Internal Affairs of the Russian Federation are systematized.

Keywords: subjectivity, methodology of subjectivity, professional subjectivity of law enforcement officers, cognitive professional activity of police officers, methodological approaches in the formation of subjectivity of cadets of

educational organizations of the Ministry of Internal Affairs of the Russian Federation.

Pedagogical support of the family in the processes of adaptation and socialization of the child at school

S. N. Koleoshkina

Abstract. The article deals with the problems of relations between parents and children during the periods of adaptation and socialization in primary school, as well as the peculiarities of interaction between a teacher and the child's family in difficult situations of a school life. Analyzing the data of scientific research, the author gives recommendations how to organize the work on informing, educating and advising parents whose children are studying in primary school.

Keywords: pedagogical impact, pedagogical interaction, adaptation to school, school socialization.

Actual issues of emotional burnout of teachers

A.V. Konstantinov, A. Yu. Tokova

Abstract. The article considers some issues related to the definition of emotional burnout of teachers, as well as the factors are investigating the greatest influence on the psycho-emotional state of the teacher and the relationship with the implementation of professional activities.

Keywords: emotional burnout, teacher, pedagogical activity, emotional overload.

Subcultures of modernity and their impact on minors

E. Yu. Kostina

Abstract. The article discusses subcultures that are gaining popularity at the time of writing, such as «cottagecore», «princesscore», «dark academy», VSCO-girls, etc. The characteristic features of generation Z are also reflected: their values, norms, ideals. A general assessment of modern subcultures and their influence on minors is given.

Keywords: subculture, minors, Internet, teenagers, socialization.

Physical training of students of educational organizations of the Ministry of Internal Affairs of Russia

A. N. Kulinichev, E. A. Nikonorov, A. A. Tretyakov, A. V. Apalkov

Abstract. In the presented article, the question of the key role of physical education in the professional training of employees of internal affairs bodies is investigated. The authors conducted a survey, the results of which were the basis for conducting an experimental study.

Keywords: physical training, professional training, physical qualities.

Moral and psychological support of the activities of the internal affairs bodies of the Russian Federation as an element of the system of work with personnel: current problems and solutions

G. V. Marchenko, V. S. Byalt

Abstract. The article is devoted to the study of the features of the moral and psychological support of the activities of internal organs. The authors, analyzing the specifics of the organization and conduct of psychological and pedagogical activities in the field under consideration, formulate and substantiate proposals for improving the institute of moral and psychological support as one of the most important elements of the system of working with personnel in the internal affairs bodies.

Keywords: moral and psychological support, internal affairs bodies, work with personnel, educational work, moral and psychological state.

Structure and content of competence «readiness for teaching activities in educational programs of higher education» in the system of training scientific and pedagogical personnel of educational organizations of the Ministry of Internal Affairs of Russia

N. V. Mikhailova

Abstract. The issues of the formation of the scientific and pedagogical potential of the higher education system in general and the educational organizations of the Ministry of Internal Affairs of Russia in particular do not lose their relevance. The continuous increase in requirements for the level and results of professional training of specialists increases the requirements for the professional level of teachers on the one hand. On the other hand, the absence of an approved professional standard for a teacher of higher education and wide academic freedoms in organizing the educational process for higher education programs (the level of training of personnel of higher qualifications) require careful, scientifically based structuring and content of these programs.

Keywords: scientific and pedagogical personnel, competence, readiness for teaching, quality of training of personnel of higher qualification.

Improving the provisions of the didactic principle of consistency and gradualness in physical exercises

N. V. Popova, V. A. Raznitsyn, Yu. A. Knyazeva

Abstract. This scientific article reveals the theoretical and practical aspect of improving the provisions of the didactic principle of consistency and gradualness in physical exercises. The concretization and improvements of certain provisions of the didactic principle of consistency and gradualness in physical exercises are considered. The research methodology was based on a step-by-step and dissected study of mechanical effects on the human body in the form of: a) movement of body parts relative to the support; b) deformation of the whole body – displacement of some of its parts relative to others. The research results have shown the contribution of mechanical vibrations and displacements of individual body parts to the overall physiological response of the body and the development of central nervous fatigue of a person. The conducted telemetric registration of accelerations (G) of the head made it possible to systematize part of the means and methods of training the athlete. The developed methodological recommendations have been tested in the practice of physical education of students of the Altai State Pedagogical University and the Altai State Agrarian University. Thus, it can be concluded that in the process of training and competitive activities, it is necessary to take into account the static effects that occur during exercises, which will help to regulate the loads of athletes more accurately.

Keywords: improvement, didactic principles of consistency and gradualness in physical exercises, means and methods of training.

The system of rating assessment of the level of mastering by students of educational programs of higher education in the context of the implementation of the competence approach

A. A. Rogozhin, O. V. Bagrintseva, I. S. Strushkov

Abstract. The article proposes a rating system for students based on the example of educational organizations under the jurisdiction of federal state bodies that train personnel in the interests of defense and security of the state, ensuring law and order. The mathematical model of the student's rating assessment takes into account all the results of monitoring progress and achievements in research activities during the period of study in an educational organization.

Keywords: federal state educational standard, competence, educational program, competence approach, student rating, rating assessment, competence formation score, control of progress, control of residual knowledge, state final certification.

Motivation of professional development and educational needs of teachers in the system of additional professional education of the Ministry of Internal Affairs of Russia

O. Yu. Senatorova

Abstract. The article deals with the problems of formation of professional motives for the professional development of teachers in the education system, as a leading factor in the regulation of personality activity, its behavior and activities at various stages of professional training.

Keywords: professional abilities, professional motivation, psychological features.

Problem analysis of the legal regulation of the use of physical force by employees of internal affairs bodies

A. L. Slavko, D. A. Platonov, A. A. Koroleva

Abstract. This article deals with the problem of legal regulation of the use of physical force by employees of internal affairs bodies. The normative legal acts that regulate the use of physical force and exceeding the established limits have been studied. The analysis of normative-legal regulation of issues related to the abuse of official powers was carried out.

Keywords: legal regulation, physical strength, internal affairs officer, fighting techniques, legal norms.

Actual aspects of improving the special readiness of police officers at the time of anxiety when using firearms

A. M. Startsev

Abstract. The article discusses the issues of formation of professionally important qualities in future law enforcement activities. The factors influencing the indicators of the formation of professional competencies, as well as the peculiarities of teaching disciplines of special training are analyzed.

Keywords: psychophysical readiness, stress resistance, special training, police officer, firearms, internal affairs bodies.

Digital educational resource as educational, methodological and organizational support of professional education

I. Kh. Telyakova, R. I. Gamidullaev

Abstract. The introduction of digital educational resources in all spheres of our life is constantly increasing, and the education is not an exception. This article is

dedicated to the description of existing digital educational tools and resources, and first of all, from their functionality point of view. However, the purpose of this study was not only to review and analyze the existing and widely used digital educational platforms, but also to achieve the practical result – to design a prototype of digital platform for foreign language teaching of cadets in St. Petersburg University of the Ministry of Internal Affairs of Russia.

Keywords: digital education resource, digital platform, e-learning, online learning, digital competencies.

The dialectics of institutional reforms in the sphere of Russian higher education

A. A. Urunov, K. K. Zoidov, I. M. Morozova

Abstract. The problem of unresolved issues of methodological, methodological and organizational support of the processes of introducing new technologies into education is raised, due, on the one hand, to the change of the educational paradigm, and, on the other, to the peculiarities of the functioning of universities in the conditions of the COVID-19 pandemic. The necessity of preserving the basic structures forming the institutional core of the university and supporting the fundamental educational processes and giving them the character of sustainability is substantiated. The results of the study can be useful in the educational process and the development of regulatory documents in the higher education system in the country.

Keywords: institutional reforms, contradictions, educational process, online learning, methodological support, education.

Traditions and innovations in the formation of methodological culture

T. N. Frolova, G. V. Shashurina

Abstract. The problems of methodological culture and scientific reflection remain very relevant. In this article, the authors consider these problems, both in their traditional understanding, and taking into account the trends in the development of modern methodology.

Keywords: logic of cognition, methodological culture, methodologization, scientific school, methodological practice.

Teaching Russian as foreign language on the postsovjet period

K. L. Khodzhabegova

Abstract. The article is devoted to substantiation of some proposals concerning the educational process of teaching Russian as foreign language: group completing, timetable projecting, making up new textbooks, qualification improvement for teachers on the postsovjet period.

Keywords: teaching Russian as foreign language, group completing, timetable projecting, making up new textbooks, qualification improvement for teachers on the postsovjet period.

The concept of the hierarchical structure of the system of professionally applied physical training of police officers

Yu. V. Chehranov

Abstract. The article considers the issue of the concept of training police officers, including cadets (trainees) of educational organizations of the Ministry of Internal Affairs of Russia, taking into account the activity orientation of the physical training system.

Keywords: concept, professionally applied physical training, police officers, cadets, professionally applied sports.

Methods of developing special endurance of police officers through ski training

A. Yu. Shalagin, D. E. Vedeneev, V. M. Bychkov

Abstract. The article examines issues related to the development of special endurance among police officers through skiing. The main problems arising in the process of skiing are highlighted, The article focuses on the basic physical exercises that contribute to the development of special endurance.

Keywords: special endurance, skiing, healthy lifestyle, activity.
