The relevance is determined by the collective nature of the activities of the police patrol service (PPSP) and the need to develop such a group style of activity that ensures the consistency and coherence of joint professional actions to solve operational and service tasks to ensure law and order in public places, protect the life and health of citizens. The article reveals the concept of “group style of activity of the PPSP employees; the results of an empirical study of the manifestations of the group style of activity of the employees of the PPSP are given; the role of the commander, the psychologist for the integrated and purposeful development of a constructive group style of activity among the PPSP employees was analyzed.

Keywords: employees of the police patrol service, group style of activity, joint professional actions (legal, tactical, psychological, preventive, etc.), commanders of combat units of the police patrol service, psychologists of the internal affairs bodies of the Russian Federation.

Psychological aspects of interrogation preparation

Yu. V. Zhikrivetskaya, A. A. Pshenichkin

Abstract. The article discusses the use of psychological methods and methods of preparation for interrogation in the investigation of criminal cases.

Keywords: interrogation, investigator, psychologist, situation, behavior.

The relationship between the locus of control and self-relations of employees of the Internal Affairs bodies

A. K. Zhuravleva

Abstract. This article discusses the main approaches to understanding the locus of control within the framework of the psychology of responsibility. Localization of control is considered in conjunction with the presence of freedom, autonomy. The relevance of the topic is determined by the fact that the locus of control is considered as a dynamic characteristic that can maintain or reduce motivation to overcome failures and continue activities. In this article, the author departs from the classical idealization of the internal locus of control and demonstrates its weaknesses, taking into account additional components. Responsibility attribution is considered from the point of view of the variable component and the stability component. These characteristics are illustrated by the results of the study, the results of which give some recommendations for interacting with subordinates with different types of localization of control.

Keywords: locus of control, responsibility, internality, externality, freedom, awareness, mature personality, self-respect, stability, variability.

Assessment of the impact of stress reactions on the functional state of employees of internal affairs bodies

E. A. Zakharevskaya

Abstract. The article analyzes the influence of stress factors on the functional state, the validity of current studies of the dynamics of the functional state, the identification of the significance of the ability to implement scientific and technical progress in research and practice as a result of experimental research, profit using the Egoscope software and methodological complex. Abstract. The article analyzes the psychological features of professional motivation of police officers; the results of the study of the content-dynamic characteristics of professional motivation are presented, the conditions for the development of professional motivation of police officers are formulated.

Keywords: professional motivation, motivational factors, professional identity, police officers, socio-psychological research in the internal affairs bodies.

Activities of juvenile affairs units for the prevention of teenage suicides

V. S. Chagin

Abstract. The article deals with the problem of prevention and prevention of suicidal manifestations among minors by juvenile departments.

Keywords: suicide, minors, prevention, juvenile departments.

Studying the attitude to physical activity among students in the framework of an integrated program for the prevention of non-communicable diseases

N. A. Bazhenova, A. I. Tkachenko, Yu. A. Knyazeva

Abstract. This scientific article reveals the theoretical and practical aspect of studying attitudes to physical activity among students. The concepts of «physical culture», «health», «physical activity», «physical exercises», «methods and means of physical education», «sports», «physical hardening» are considered. In preparation for the integrated prevention of noncommunicable diseases program, the task was set to study the attitude to physical culture among students of higher educational institutions. For the study, a standardized written survey was used to determine the attitude of students to 10 types of physical activity. Thus, the analysis of the results of the study showed that the physical activity of students depends on the specific conditions of the district and the city, identified areas that

need to be given more attention, revealed the reasons, the elimination of which will help to increase the physical activity of students.

Keywords: physical culture, health, physical activity, physical exercises, methods and means of physical education, sports, physical hardening.

Improving the quality of translation of legal vocabulary by students on the example of multimedia English-Russian dictionary

N. V. Bykhtina

Abstract. The article considers the problem of translation of practical-oriented terminology, expressed in inaccurate interpretation of legal context. The need to select terminological vocabulary to create a multimedia dictionary aimed at improving the quality of legal translation is emphasized. The algorithm of working with electronic publication when translating lexical units used in oral and written communication of the law enforcer is given.

Keywords: translation quality, legal terminology, police student, law enforcement, dictionary article.

The importance of ethical principles of a teacher in the formation of a professional and moral position of young law enforcement officers

A. V. Vashkevich, V.A. Belyankina, I. A. Bobrova, A. G. Ermakov

Abstract. This article discusses the problems of cardinal modernization of the education system of the Russian Federation, using the example of students of educational institutions of the Ministry of Internal Affairs of Russia and the role of teachers in the purposeful formation of creative and creative personality qualities of cadets and students of educational organizations of the Ministry of Internal Affairs of Russia, their abilities to independently acquire knowledge, skills and skills, generate new modern scientific, technical and social ideas. The need to reform the educational process and radically change the structure of pedagogical activity of teachers is due to the demands of practice and the improvement of the security system of modern society. Thus, the formation of the subject position of cadets is possible if the teachers of the educational organization themselves take a subject position in the educational process, determining the pedagogical guidelines of their own activities.

Keywords: pedagogical activity, higher professional education, innovative activity, police officer, pedagogical position, cadets, students of educational organizations of the Ministry of Internal Affairs of Russia.

Gamification as an innovative form of teaching special disciplines

in departmental educational institutions of the Ministry of Internal Affairs of Russia

A. A. Vikhlyaev

Abstract. This article touches upon topical issues of applying innovative gamification methods in the process of teaching special practice-oriented disciplines in departmental universities of the Ministry of Internal Affairs of Russia. The basic mechanics and components of the methodology are described, as well as practical recommendations are given for the introduction of gamification into the regular educational process during special and interdisciplinary classes.

Key words: gamification, dynamics, game mechanics and components, quest, interactive reception, learning, education.

Features of psychological and pedagogical prevention of children planning to arrange a shooting at school

O. M. Doroshenko, N. B. Nizhnichenko

Abstract. The issues of psychological and pedagogical motives of the moods of modern adolescents and preventive actions aimed at safe education in educational institutions and the prevention of «schoolshooting» among persons under the age of majority are considered.

Keywords: safety, boredom, teenager, school, reason, event.

Prevention of deviant behavior of minors produced by content on the Internet

S. S. Zhevlakovich, D. D. Chizhova

Abstract. The article examines the features of the mechanism of the impact of the Internet information space on minors and the relevant factors determining their deviant behavior, presents the experience of forming a local system of prevention and prevention of deviant behavior of minors produced by the content of the Internet.

Keywords: prevention of deviant behavior, diagnosis of deviant behavior, cyber dependence, content, Internet, information space, legal measures, organizational measures.

Final certification on the language training of candidates for peacekeeping missions under the auspices of the United Nations

V. A. Kuramshin

Abstract. The article is devoted to the main aspects of the final certification of the language training of employees of the Ministry of Internal Affairs of Russia and police officers of African states who are sent to serve in UN peacekeeping operations. The format of the qualification exam is studied. This exam includes a

component assessment of language training for the implementation of a peacekeeping mission. The content and procedure of this exam are presented as a form of final certification of employees of the Ministry of Internal Affairs of Russia studying at the Training Center for Employees to participate in peacekeeping missions on the basis of the All-Russian Advanced Training Institute of the Ministry of Internal Affairs of Russia. The features of this final certification on the language training of candidates for peacekeeping missions under the auspices of the United Nations in the modern additional education of trained police officers are fixed.

Keywords: professional training, language training, United Nations, peacekeepers, employees of the Ministry of Internal Affairs of Russia, qualification exam.

Psychological features of the application of the theory of symbolic interactionism in the professional activities of employees of Temporary detention centers for juvenile offenders

B. Lebedev, O. L. Mironenkova, D. R. Zykov

Abstract. The development of the child and the formation of his personal qualities are well explained from the point of view of the «theory of symphonic interactionism». In other words, how a child develops, assimilating a symbolic human culture. This development must necessarily pass through certain stages. Violations associated with the parents' ignorance of these stages of the child's development lead him to the TsVNPS, where, in turn, the police caregivers must «correct» the shortcomings of parental education.

Keywords: symbolic interactionism, temporary detention center for juvenile delinquents.

Artificial intelligence application as an optimization tool of research activity: pro et contra

I. S. Lukinsky, I. A. Gorsheneva, A.V. Sumina³

Abstract. The article analyzes the prerequisites of scientific approaches to the creation of artificial intelligence, considers prospects of its use as a key component of the general vector of human development. The problematic issues related to the application of AI as an innovative tool for organizing research activities, as well as the processing, analysis and generation of test files are separately outlined.

Keywords: Artificial intelligence, AI, innovative tool, scientific research activities, ChatGPT

Formation of a time culture among cadet-athletes

S. I. Manuylov, V. N. Kosyakin, S. A. Knyazev

Abstract. The article highlights a very important and at the same time little-developed problem – the formation of cadets-athletes necessary for mastering

technical and tactical skills of the property called by the authors "culture of time". It allows the cadet-athlete to better navigate in micro-time intervals, evaluate and control it, regulate movements and actions in conditions of a tight time limit. To find out how the increase in the culture of time affects the activity of athletes, a series of observations were made during training and competitions. Comparative assessment of athletes' qualities by their coaches and self-observation material were also used. Thus, the author's position is that the management of the athletes' time culture can find wide application in coaching practice of a variety of sports.

Keywords: formation process, time culture, integral effect, technical and tactical skill.

On the need for psychological conditions for the implementation of innovations in the organization and scientific and methodological support of fire training

A. Yu. Nesterov

Moscow University of the Ministry of Internal Affairs of Russia named after V. Ya. Kikot', Moscow, Russia, a.u.nesterov@gmail.com

Abstract. The article discusses a number of ways to manage the emotional state of police officers when training to shoot from military weapons and use them in official activities.

Keywords: shooting, autoregulation, firearms, mental resources, behavioral responses, shot production.

Problems and advantages of remote technologies in teaching psychological and pedagogical disciplines in departmental higher school

N. V. Nikolaeva, L. Ya. Smirnova, V. S. Klementieva

Abstract. The article analyzes the problem of using distance learning methods in the teaching of psychological and pedagogical disciplines and disciplines of the humanitarian cycle in general. The authors note the disadvantages and advantages of this pedagogical technology in the training of police officers who must have effective communication skills and conflict resolution competence. Based on a comparison of traditional and distance technologies, the effectiveness of their use in the classroom was assessed in terms of communication, perception and interaction. Conclusions are drawn about the appropriateness of using distance learning methods as auxiliary, about their specific advantages and disadvantages.

Keywords: distance technologies, traditional education, communication, student motivation, effectiveness and appropriateness of application, digitalization.

Psychological and pedagogical aspects of the development of police officers' readiness for professional activity

D. Kh. Nosova, L. A. Amirova, M. O. Khatuaev

Abstract. In this article, a comparative characteristic of the terms "professional readiness" and "professional activity", "official activity", "labor activity" is made. The components and levels of readiness for professional activity are considered. The authors come to the conclusion that the assessment of the readiness of a police officer as a specialist is carried out on the basis of his psychological, physical and professional readiness for future activities. The issues of pedagogical conditions of training of police officers are considered.

Keywords: professional readiness, professional activity, police officers, professional competencies, readiness components, readiness criteria.

The use of the game method in teaching conflict interaction of martial artists

V. V. Puzhaev

Abstract. The article discusses the concepts of the game and the game method in relation to martial arts, and also defines the game conflict and highlights the stages of its development. The results of the survey and pedagogical observation of the construction of the educational and training process of the leading wrestling coaches are analyzed and presented. The purpose of the survey was to establish what pedagogical tasks when using the game method are set by trainers in the field of martial arts, the purpose of pedagogical observation was to establish how often the game method is used during training. As a result of the research, it was revealed that coaches of a higher category are 3.2 times more likely to use the game method in training, especially when improving the skills to apply tactical and technical actions in conditions of a conflict of interests of the opposing sides.

Keywords: game, game method, conflict, conflict interaction, martial arts, tactics.

About the military-pedagogical experience of reconnaissance training of aviation gunners

V. D. Samoilov, A. K. Pimanov²

Abstract. Intelligence training as an academic discipline has been included in the combat training system of the Ground Forces since 1970, by order of the USSR Ministry of Defense dated September 14, 1969. The objective need for this is caused by the following reasons: a) in the post-war period, the tasks of reconnaissance in the practice of troops were mainly solved by regular reconnaissance units and divisions; b) the experience of the Great Patriotic War was undeservedly forgotten, when conducting reconnaissance by all commanders, staffs and personnel of diverse forces and means was a prerequisite for defeating the enemy with little blood. The improvement of the military education system (hereinafter referred to as SVO) for a successful Special Military Operation (hereinafter referred to as SpVO) involves the realization of the main goal – to ensure maximum efficiency of the sources of replenishment of the officer corps

with a minimum of costs under the guarantee of stable recruitment of troops and forces by officers with high professional and moral and psychological qualities.

Keywords: evaluation of the enemy; organization of reconnaissance; aviation guidance.

The use of means and techniques for improving the shooting technique in service biathlon when performing lead-up exercises in the shooting type of the program

V. O. Sveshnikova

Abstract. The article deals with the issue related to the currently existing methods of training shooters, the use of leading shooting exercises, means and techniques necessary for the qualitative preparation of athletes for the shooting type of the service biathlon program.

Keywords: firearms, service biathlon, blanked weapons, improvement of shooting technique, training process.

Research of readiness of graduates of universities of physical culture to work in various positions in the field of physical culture and sports

S. I. Suprunov, A.V. Kornaushenko, T. Sh. Kazbekov

Abstract. This scientific article describes the theoretical and practical aspects of studying the readiness of graduates of universities of physical culture to work in various fields of physical culture and sports. The study examined the opinion and assessment of specialists in the field of physical culture and sports on some aspects of vocational education, as well as the readiness of graduates of the Institute of Physical Culture and Sports to work in various positions in their field. According to the results of the study, graduates of universities of physical culture feel the most prepared to work as a sports coach, a physical education teacher at school and a physical education teacher at the university. Based on the data of the conducted research, it can be argued that higher education institutions of physical culture need a greater professionalization of education by improving the cycle of special disciplines that reveal the content of professional activity in the positions of teacher-organizer, instructor-methodologist of industrial physical culture, researcher, organizer, methodologist of therapeutic physical culture

Keywords: physical education personnel, physical education, physical culture, sports, mass communication media.

The role of the family in protecting minors from a destructive information environment (analysis of a sociological survey)

S. E. Titor

Abstract. The urgency of protecting minors from destructive information is quite high, since in the modern world, where technology has taken a leading position in human life, including children, replacing not only live communication with people, but also transferring a person's entire life to the Internet space. The information environment affects the upbringing of children, because they spend a lot of time in networks. Family, parents are the most important responsible in the upbringing of children. Their role in protecting minors from any threats, including the information environment, is undeniably great. However, parents alone will not be able to cope with this problem. This study analyzes the opinion of parents about their role in protecting minors from destructive information, their attitude to the measures taken by the state and educational organizations aimed at this protection. The opinion of parents about the need to improve such measures, as well as the conduct of training activities, is analyzed.

Keywords: parents, protection of children from destructive information, parent education, extracurricular activities, Internet, social advertising.

Formation of general cultural competencies of cadets in educational institutions of the Ministry of Internal Affairs of the Russian Federation with the help of sports and recreational activities

K. A. Tonoyan

Abstract. This article discusses the features of the formation of general cultural competencies of cadets of educational organizations of the Ministry of Internal Affairs of Russia with the help of physical culture and recreation activities, which helps the formation and development of a professional personality. Physical culture and recreation activities instill the importance of physical training with the help of general cultural competencies, which determines the trends of increasing the effectiveness of the implementation of the professional activities of employees of the Ministry of Internal Affairs after passing the training period. The article presents an analysis of a study conducted with the help of a survey of cadets of an educational organization of the Ministry of Internal Affairs of Russia. The results of the survey determine the effectiveness of the current system of formation of general cultural competencies with the help of physical culture and recreation activities within the framework of physical training of students.

Keywords: general cultural competencies, formation of general cultural competencies, cadets of the Ministry of Internal Affairs of Russia, physical training, physical culture and recreation activities, cadets of educational organizations of the Ministry of Internal Affairs of Russia.

Trends in the development of physical training of officers of the Ministry of Internal Affairs of Russia in modern conditions

M. A. Ushakov, V. M. Bychkov, S. M. Bobovkin

Abstract. The article deals with the ways to improve professional physical training of employees of the Ministry of Internal Affairs of Russia in a complex crime situation. Some promising directions of modernization of the training process of this fundamental discipline in educational organizations of the Ministry of Internal Affairs of Russia are highlighted. It is considered that successful implementation of the indicated ways of improving its content and teaching methodology will improve the quality of physical training of young professionals, which will have a positive impact on the effectiveness of their performance of operational and service tasks related to the use of physical coercion and service and combat tasks.

Keywords: physical training; improvement of the educational process; professional training of Russian Interior Ministry personnel; training methods; practical orientation of services and units; special physical qualities; use of physical coercion measures; skills associated with the use of physical force and special means; combat fighting techniques.

Application of the competitive method in classes on general physical training of students of educational organizations of the Ministry of Internal Affairs of Russia

E. V. Flusov, S. N. Barkalov

Abstract. This article discusses one of the aspects of training police officers to perform control exercises of general physical fitness and improving basic motor qualities through the use of a competitive method during training sessions. Recommendations on the organization and conduct of competitions on publicly available types of physical exercises within the framework of one training session in the system of educational organizations of the Ministry of Internal Affairs of Russia, taking into account the experience of holding events on the TRP complex, are proposed.

Keywords: physical training, police officers, methods of physical education, competitive method, physical qualities, control exercises.

The systematic approach and its role in scientific research

T. N. Frolova, G. V. Shashurina

Abstract. The systematic approach, the most complex and at the same time effective, is considered by the authors as the methodological basis of scientific research. The researcher's focus on understanding the integrity of the object and

identifying its diverse relationships and relationships increases the reliability and effectiveness of the research program.

Keywords: system approach, systemology, integrity, complex system, scientific methodology.

Urgent and long-term adaptation in official activity to physical exertion

V.A. Khromov

Abstract. This article is devoted to the important issue of adaptation of cadets as an important and integral part of their professional activities to avoid stress and mistakes in the service in advance.

Keywords: adaptation, urgent adaptation, long-term adaptation, stress
